Innovative solutions at work for you

SOLVING YOUR BUSINESS CHALLENGES WITH TECHNOLOGY SOLUTIONS YOU NEED

For small- and medium-sized enterprises, complex business requirements often demand a fully integrated ERP solution such as SAP. But, full-scale SAP implementations can involve prolonged commitments of scarce internal resources, can be cost prohibitive, and often are overwhelming.

Element Five understands this challenge and has developed a perfect solution for SMEs . . .

Our SAP All-In-One offering is a fixed-price, out-of-the-box solution that renders all of the major SAP functionalities and strategies relevant for SMEs. And, as we streamline the deployment for SME needs - by specific industries and verticals within industries - your business does not get bogged down with a time-consuming SAP project. Instead, you get a **rapid SAP implementation** so that you can avoid deployment headaches and focus on your core business.

SAP BI SOLUTIONS

Enterprise reporting with intelligence and more than business. Applying our experiences to build a closed loop BI solutions that not only measure the performance but provide insights into the business. Please contact us for your next BI project

flexible solutions for your business needs

PROJECT ENGAGEMENTS

Whether due to changing business needs or a recent merger or acquisition, once you start an SAP implementation or upgrade, the entire process can spiral out of control with tight deadlines and unanticipated demands.

With Element Five's project engagements, however, you can avoid common SAP obstacles and complete projects more quickly, with lower costs, and with predictable outcomes. . .

STAFFING SOLUTIONS

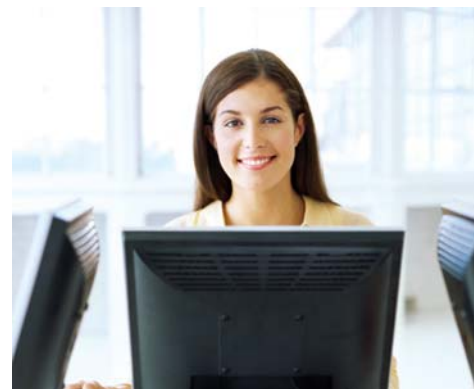

From global IT consulting firms to multinational corporations, having the right staff - in skill set and number - can be the difference between an SAP strategy that works and one that does not.

Element Five provides just-in-time SAP staff augmentation for companies that have a high volume of implementation projects but lack the resources to meet the demand. More than just increasing staff numbers, however, companies that work with Element Five receive staff members with world-class expertise in SAP deployments and strategies. As a result, projects run smoother, challenges are met more quickly, and clients are more satisfied.

ELEMENT FIVE SOLUTIONS PROVIDES TOTAL END TO END ERP SERVICES.

APPLICATION MANAGEMENT

In today's fast global economy, companies must regularly maintain deployed SAP systems, immediately address user-reported problems, and continuously improve ERP solutions to respond to evolving business needs. As a result, application management and support for SAP deployments can be a significant cost center as well as a strain on internal resources, especially for small- to medium-sized enterprises.

With Element Five Solutions' AMS, you won't worry about such challenges...

Our AMS services allow you to **reduce operating expenses by outsourcing the application support for your SAP ERP system.** In addition to tremendous savings compared to maintaining in-house IT staff for such needs, our AMS services deliver world-class, leading edge SAP support so that you can rest easy over your SAP reliability.

CUSTOM APPLICATIONS

We develop customized software that adheres to SAP's Enterprise services-oriented architecture (Enterprise SOA). These services provide competitive advantages through innovation, operational excellence, and best business practices.

We use a model-driven environment to develop, configure, and adapt user interfaces for SAP-delivered applications and to develop, model, and configure custom composite applications.

SAP CRM SOLUTIONS

Customer interactions are lifeline for the business to sustain and at Element five we take this very seriously. We can help you implement SAP CRM to build the next generation platform to track your valuable customers.

SAP UPGRADES

Business are often challenged with archaic technologies and are unable to provide adequate support. At Element five we understand the challenge and need for the business to upgrade technology platforms and yet keep the business continuity. We strive to provide the best experience for your next SAP upgrades
